

Fresh Air Hood Systems

AFH40-FR-FAN

CP4B-CS-HOOD or CP4B-CS-BELT

- Fresh air hood systems provide comfort to user by driving external air into the hood.
- Outside ambient air helps to purge the warm humid air from inside the hood.
- Fans run on field replaceable AA alkaline or rechargeable batteries — no need for a special charger. Alkaline batteries tend to last 20% longer than rechargeable batteries.

Fresh Air Hood Systems
