

1000V RATED INSULATED FLASHLIGHTS

Workers inevitably place their source of light in their mouths while working creating a ground and a large potential hazard.

Cementex offers fully insulated 1000V rated flashlights to eliminate this hazard. Using the well-known trusted and respected MINI MAGLITE® flashlight and MINI MAGLITE® LED flashlights.

- Ready to use with new 2-Cell AA batteries installed
- Retains ability to replace the batteries
- Standard bulb model (FLAA-6I) has the ability to change out the light bulb and an additional bulb comes standard in the cap. Average lumens 15.4. Overall length 6”.
- LED model (FLED-7I) uses technology that extends battery life. Average lumens 140.0. Overall length 7”.
- Adjustable light beams—Wide Flood to Intense Spot

Manufacturer Recommendations:

- Use of only alkaline batteries from a reputable manufacturer. Neither rechargeable nor reusable batteries should be used.
- Infrequent use of flashlight (once a month or less) suggests storing batteries separately.
- Place a small amount of petroleum jelly on all threads and rubber O-rings every six months for general maintenance.

Cementex double-insulated tools:

- Comply with the IEC 900 standard
- Comply with ASTM F1505-01 standard
- Help you meet requirements of:
OSHA 1910.331-335 | NFPA 70E 2004 | CSA-Z462

Cementex double-insulated tools are:

- Tested to 10,000 VAC and rated for 1,000 VAC when working on live parts
- Made in the U.S.A.
- Marked with the international safety symbol –  1000V
