

INSULATING ROLL BLANKETS

- Convenient
- Flexible and Easy to Cut
- Low Cost
- Flexible to -40°F
- Flame Resistant—Self Extinguishing
- Fabric Reinforced - Puncture & Tear Resistant
- Complete Visibility

Protect workers from low voltage electrical hazards, with insulating material on a roll. Made from a high strength fabric reinforced Type II rubber, workers can custom-cut fit each application at the job site. This minimizes the number of different low voltage blankets sizes and shapes that would otherwise need to be carries from job to job.

It is highly puncture and tear resistant, is flame (self-extinguishing), oil, and ozone resistant. Comes in a convenient 36" wide roll, 30 feet. in length in unique colors making it easy to identify and highly visible in the work area.

Insulating Roll Blankets meet ASTM F2320 standards.

No annual retests are required on the Clear PVC Roll Blanket. Sections that have been worn or damaged should be discarded.
