

Clear PVC Roll Blanket

Protect workers from low voltage electrical hazards with insulating material on a roll. This allows workers to custom-cut fit each application at the job site. This minimizes the number of different low voltage blankets sizes and shapes that would otherwise need to be carried from job to job.

- Convenient
- Flexible and Easy to Cut
- Low Cost
- Flame Resistant — Self Extinguishing
- Flexible to -40°F
- Complete Visibility

Clear PVC material permits complete visibility, yet provides the necessary insulating properties meeting ASTM F1742 standards.

It is highly puncture and tear resistant, is flame (self-extinguishing), oil, and ozone resistant. Comes in a convenient 36" wide roll, 30 feet in length.

No annual retests are required on the Clear PVC Roll Blanket. Sections that have been worn or damaged should be discarded.

Part Number	Description
PVC-7.5	Class 1: PVC Full Roll 3' x 30' (Clear)
PVC-7.5K	Class 1: PVC Full Roll 3' x 30' (Clear) Kit
ES-CLAMP	ElectroShield Clamp (Pair)
ES-CSB	ElectroShield Carry/Storage Bag

**Roll Blanket Shielding Kits include:
Shielding Material selection, Clamps (Pair)
and Bag. Pictured with ESO-7.5 material.**
