

Laboratory Creed

Adopted by

Association of North American Independent Laboratories for Protective Equipment Testing

As professional testing laboratories, we shall place service, candor, justice, and the public welfare in safety before profit and personal advantage.

We shall strive to further: safe testing procedures, improved standards through ANSI/ASTM, and uniformity in electrical testing.

We shall act collectively and individually to protect the integrity and dignity of our profession.

In humility and with the need for divine guidance, we make this pledge.
