***NOTE:** All items made of Navy Protera® with APTV of 12cal/cm<sup>2</sup>*

- These arc protective garments are manufactured with DuPont™ Protera™ fabric. It is engineered to provide protection from electric arc hazards.
- Protera is inherently FR—this means that the FR protection will not wash out or wear away. It's lightweight, durable, comfortable and meets the needs of NFPA 70E requirements.
- Front closures, cuff and ankle closures feature hook and loop straps to provide addition protection.
- Outer surface of shield window is scratch resistant coated to last longer. The inner surface of the shield is antifog coated for clearer visibility with a Visible Light Transmission (VLT) of 60%
- **Kits include:** style selection (coat and pants *or* coverall) along with 12 Cal/cm<sup>2</sup> face shield and hard hat, safety glasses and storage bag. Kits ending in 0 or 2 also include indicated class glove kit which includes insulating rubber gloves, protectors and canvas glove storage bag — please indicate glove size when ordering.
