

# COOLING VESTS

---

Jacket Style Cooling Vest—Regular or Tall  
(shown with cooling packet)

Pullover Style Cooling Vest

- FR Cooling vest **MUST** be used in conjunction with **AND** under the appropriate arc flash protection.
- Vest is **NOT** intended as primary arc flash protection.
- Vest is **NOT** arc-rated due to the limited surface area it covers.
- Each vest comes with one set of 8 cooling packs.
- Additional cooling packs available individual and as sets.
- Manufactured in the USA to meet OSHA 29CFR 1910.269
- Regular sized to fit heights 5' to 5'10".
- Tall sized for heights 5'11" and up.
- Cooling time of one hour depends on ambient temperatures and exertion level of worker wearing the vest.
- Wear the cooling vest snug to the body (not tight) to the rib cage to provide cooling for upper torso for maximum cooling effect.
  - For ideal comfort, place cool packs in ice water before using. A spare set can be kept in cooler and rotated with those in vest for continuous use.
  - Freezing the packs will extend the cooling time but the temperature difference will be more noticeable to the body.
