

At Cementex, we always strive to provide the right tools for your job. That being noted, we are pleased to announce additional options to the standard tool description "7inch Diagonal Cutting Pliers".

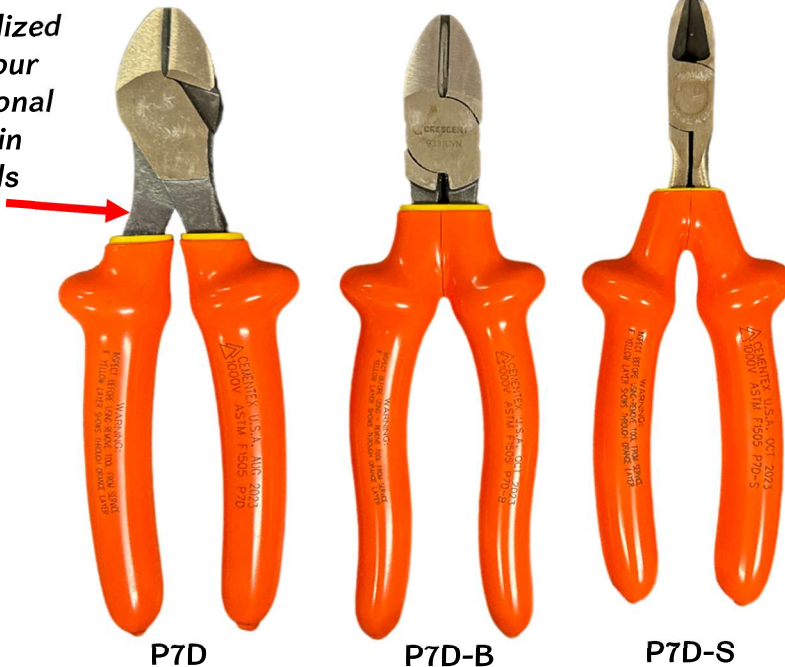

As our industries continue to develop safe, live electrical work techniques the demand for insulated tools grows. A variety of Diagonal Cutting Pliers have become a "necessity" in providing the right tool for the job. Cementex has therefore developed 3 different styles of 7" diagonal plier to meet these needs.

The P7D, which will be our standard for kits referencing a 7" diagonal plier, utilizes a lap joint construction and has a slightly wider head than previous revision. This style provides more leverage and an easier cut for most tasks being performed. The P7D-B features a box joint construction with a slightly slimmer head allowing access to tighter locations which may not be as accessible with the standard P7D. The P7D-S is the new "Slim" box joint diagonal plier which is designed to allow access to the tightest locations.

Some companies make safety tools... Cementex is The Safety Tool Specialist.

Part # Clarification	Previous Product Description	Previous UPC Code	New Part Number	Replacement Product Description	UPC Code
P7D	7" Diagonal Pliers	696812016133	P7D* (default)	7" Diagonal Pliers	696812016133
P7D	7" Diagonal Pliers	696812016133	P7D-B	7" Box Joint Diagonal Pliers	696812153708
P7D-S* (NEW!)	0--	--	P7D-S	7" Slim Box Joint Diagonal Pliers	696812153692

Cementex will remain standardized on this unit for our primary 7" Diagonal Pliers including in any kits that calls for this plier.

NEW!!

Plier	Head Width	Head Depth	Head Length	Exposed Length
P7D	1-1/8"	7/16"	2"	2-5/8"
P7D-B	15/16"	1/2"	2-1/8"	2-1/4"
P7D-S	9/16"	3/8"	2-1/8"	2-3/8"
