

Dielectric Footwear

A sturdy pair of dielectric rubber footwear is a critical component of electrical safety PPE, protecting workers in high-voltage environments. Utility workers, repair technicians, and employees working in high voltage environments can all benefit from the full-fledged protection of insulating footwear.

- Allows personnel to safely mount and dismount equipment from the work zone
- Allows personnel to safely retrieve material from truck bins
- Protects ground workers from step and touch potential in the work zone, not just one confined work area, like a grounding mat
- Help reduce the amount of electrical workers in a work area since they are not confined
- Dielectric ozone resistant rubber is 100% waterproof
- Construction of overshoes is hand-layered in full-cut patterns to fit over work boots
- Conforms with ASTM F1117
- Tested to ASTM F1116 at 20,000 Volts

Dielectric Footwear	
Part Number	Description
CPBOS-(size)	Overshoe w/Buckles: Red/Black (size)
CPDHO-(size)	Dielectric Over Shoe: Red/Black (size)
CPR12OS-(size)	14" Deep Heel Overboot: Red/Black (size)
CPR17OS-(size)	17" Deep Heel Overboot: Red/Black (size)

Available in whole sizes 7-17

- If wearing with Tennis or Gym shoe - order same size
- If wearing with Work Boot - order one size up
- If wearing with Steel Toe - order two sizes up

lead times vary by style, size and quantity required

Storm Overshoes

CPBOS-(size)

- Two-buckle storm overshoes include bob sole with aggressive tread for better traction
- Deep heel and improved arch designed for climbing ladders comfortably
- Wide opening allows for easier on and off
- Attached buckle and hardware is nonmetallic
- Weight: 4 lbs.

CPDHO-(size)

- Non-buckle overshoes
- Durable nylon lining makes them easy to get on and off
- Non-skid bar tread outsole
- Deep heel and improved arch designed for climbing ladders comfortably
- Weight: 6 lbs.

Overboots

CPR12OS-(size)

- Wider upper boot with integral pull up handles intended to facilitate donning over standard work boots
- Rear kick-off ledge designed for hassle-free removal
- Reflective stripe for enhanced visibility
- Wider opening and nylon lining also enables accurate sizing and a more comfortable fit
- Durable sole construction with non-skid bar tread out sole.
- Height: 14"
- Weight: 8 lbs.

CPR17OS-(size)

- Wider upper boot with integral pull up handles intended to facilitate donning over standard work boots
- Rear kick-off ledge designed for hassle-free removal
- Reflective stripe for enhanced visibility
- Wider opening and nylon lining also enables accurate sizing and a more comfortable fit
- Durable sole construction with non-skid bar tread out sole.
- Height: 17"
- Weight: 8 lbs.
