

# Bit Sockets: Phillips Tip Screw Driver

Cementex offers 1000V rated insulated bit tip sockets for use with insulated tools including ratchets, torque wrenches, extensions bars, T-Handled square drives, breaker bars, etc.

Cementex's unique coating technique allows the socket to be shaped in a way that the insulation is slimmer at the point of contact with the nut or bolt. This allows Cementex insulated sockets to access equipment where other manufacturer's sockets won't fit.
