

# Sockets: 1/4" Square Drive

Cementex offers 1000V rated insulated sockets for use with insulated tools including ratchets, torque wrenches, extensions bars, T-Handled square drives, breaker bars, etc.

Cementex's unique coating technique allows the socket to be shaped in a way that the insulation is slimmer at the point of contact with the nut or bolt. This allows Cementex insulated sockets to access equipment where other manufacturer's sockets won't fit.

Refer to our [Interchangeable Tool Compatibility](#) information to assess/confirm proper compatibility, compliance and coverage.
