

Storage: Tool Boxes or Cases

Tool Box and Cases are options for storing and protecting your insulated tools. There is room to add plenty of your non-insulated tools too, but with as durable as our insulated tools are, just always use our insulated tools! Cases can be custom designed with die-cut foam for quick visual tool accountability or for organization. Based on the storage box or case dimensions, some tools may or may not fit with or even without foam. Some of the cases have tools pockets, or holsters, designed for specific tools, often times we can “repurpose” them to work with many combinations of tools.

Always feel free to reach out to us directly to see how we can accommodate the tools that you require, and we will work to design a kit with the appropriately sized storage option.
