

Storage: Tool Pouches

Tool Pouches are convenient ways to store and protect your insulated tools. They fold over and roll up into a smaller footprint.

We have certain tool pouches designed for various types of tools as indicated by the part description. Often times we can "repurpose" them to work with many combinations of tools.

Always feel free to reach out to us directly to see how we can accommodate the tools that you require, and we will work to design a kit with the appropriately sized storage option.
